GENERAL PAYMENT CONDITIONS

All listed prices are **ex works, incl. 19%VAT** Czech Republic, without transport costs. So the export prices for customers out of Europe prices 19% are valid. When boats are transported abroad by us, we add **30 – 50,-** euro for the transport and customs fees. Paddles can be shipped by mail, boats by a transport firm. Any advance is not required, with your order or before a production. Preferred method of payment is cash on delivery. If the payment is by a bank transfer, an additional **+1%** will be added, by a cheque **+2%**. The goods are sold with a complete world wide guaranty. Boats respect international dimension and weight rules.

PADDLES

All blades are made from first - class epoxy resins, fiberglass, kevlarcarbon or high modulled carbon fabrics. The blades are in sandwich construction, giving high rigidity and strength with a low weight. Shafts are made of epoxy resin and special carbon rowing, with high strength, optimal flexibility and low weigh. All kayak blades are produced for standard shafts with diameter of 30mm. With a small adaptation it is possible to use also shafts with a diameter 28mm (youth, women). Blades in **CLUB** class are from the fibreglass with limited reinforcements from carbon. They are sufficiently strong for any usual use. Lower mechanic parameters from the fibreglass are partly compensated by its weight. The **RACE** class blades consist of 45% fibreglass, 45% aramid-carbon and 10% carbon tissue. Their rigidity, weight and price are the a good compromise in our opinion. The **ELITE** class blades are the top product of best possible parameters, made exclusively from refined, mainly carbon tissue. It is the best you can get. By an order all the mentioned blades can be made with a metal tip (wild or shallow water, sea kayaks etc., + 5 euro/pair). When paddles are sold assembled (blade joined to the shaft) there is a full guarantee for the joint between the shaft and blade.

A guarantee can not be given for the area of the assembly if paddles (blade and shaft) are assembled by the customer and **especially any guaranty is not given in any case if hot melt glue is used** as an adhesive, as high temperatures can damage the shaft and the blade. Even after long periods of usage, a hot melt glued joint can break easily.

KAYAK BLADES

				EUR/PAIR
F 001	Z I	The smallest wing style blade	43 x 14,5	69,-
F 002	BABY	Flat blade	43 x 18	109,-
